

1968 WAGE RATES, SALARIES

AND

HOURS OF LABOUR

IN NOVA SCOTIA

Economics and Research Division
Nova Scotia Department of Labour
Halifax, Nova Scotia

HON. THOMAS J. MCKEOUGH, M.D.
MINISTER

FOREWORD

This publication contains data on wage rates, salaries and hours of labour in Nova Scotia Industry as of October 1, 1968.

The report is prepared from information gathered by the Canada Department of Labour for their annual survey, entitled Wage Rates, Salaries and Hours of Labour. The Economics and Research Division of the Nova Scotia Department of Labour has cooperated with the Canada Department in the conduct of this mail survey. Our Division has translated this computerized information into detailed tabular form on industrial and regional bases.

These statistics are compiled by industry, province, county, and the six urban areas. In all, there have been 43 industries, 14 counties, and six urban areas surveyed.

We wish to express our appreciation to the Nova Scotia employers whose participation in the survey has made possible the preparation of this report.

This survey has been compiled under the supervision of Mr. Kenneth Horne by Miss Mary-Evelyn Ternan and Miss Sharon Skerry, and typed by Miss Wendy MacKenzie.

C. JEAN DOBSON

GUIDE TO THE CONTENTS OF THE REPORT

This report presents information on wage rates and salaries by occupation and on hours of work in industry in Nova Scotia. The information covers the last normal pay period prior to October 1, 1968.

TECHNICAL NOTES

The Technical Notes outline the scope of the survey and describe the methods used in compiling the information included in the report. They also explain the nature and context of the tabular material presented, the terms used in the report and the criteria for publication.

PART 1: HOURS OF LABOUR

Information on standard hours of labour is included for the five major industries as well as 13 sub-industries. The average standard hours per week are shown for each industry under the headings, Office and Non-Office. Non-Office includes maintenance trades, service occupations, and specific industry occupations.

PART 2: INDUSTRY WAGE AND SALARY RATES

This section is composed of 43 separate industry tables of occupational wage rates. These industries come under five general headings: Manufacturing; Transportation, Communication, and Other Utilities; Trade; Service; and Public Administration. Subject to our criteria for publication, each industry table presents information for a number of occupations characteristic of the industry being surveyed.

PART 3: PROVINCIAL WAGE AND SALARY RATES

Certain office and non-office occupations were studied on a provincial basis. Included are 45 office occupations and 21 non-office occupations, for a total of 66. In these charts an average salary or wage rate is given.

PART 4: COUNTY WAGE AND SALARY RATES

Fourteen of the 18 counties were studied, the exceptions being Antigonish, Guysborough, Richmond and Victoria, for which none of the given information satisfied our criteria. The tables include all office occupations, maintenance trades, service occupations and specific industry occupations in each county where the criteria has been met. This year the specific industry occupations have been classified by major industries. For each occupation, the average and predominant range are included.

PART 5: URBAN AREA WAGE AND SALARY RATES

In this report, the six urban areas of Nova Scotia were studied. As in the previous report, each urban area includes not only the immediate city or town but also the entire surrounding area. Please see Appendix B for more details as to the delimitation of each area.

PART 6: INTER-INDUSTRY AND INTER-COUNTY OCCUPATIONAL COMPARISONS

Two tables concentrate on the comparison between 1967 and 1968 provincial wage rates for selected maintenance and office occupations. Additional tables record wage trends between the county and the urban area within the county as well as wage changes in the same industry and occupation from one county to another.

APPENDIX

This final section of the report defines certain occupational terms which the reader may find useful in comparing salary rates. There is also a map showing the various urban centres as well as a list giving the delimitation of the areas covered.

TECHNICAL NOTES

The complete survey of Wage Rates, Salaries and Hours of Labour covers over 1,000 establishments in Nova Scotia. Generally included are all reporting establishments having 20 or more employees in the industries and urban areas surveyed. However, returns from establishments having eight or more employees are included for the following industries: Commercial Printing, Printing and Publishing, Motor Vehicle Repairs and Retail Trade.

The Federal Government conducts the survey by mail and a reporting form-questionnaire containing a short description of each occupation to be surveyed is sent to the employers. Occupational descriptions are provided to help employers identify the specific jobs for which wage information is requested. The survey questionnaire is broken into four parts.

1. General Questionnaire: Provides information on number of employees and hours of work, etc.
2. Office Occupations: Includes workers engaged in clerical, accounting and secretarial activities. Office employees are typically paid on a salary basis.
3. Maintenance Trades, Service Occupations and General Labourers: These are engaged in the provision of maintenance and auxiliary services closely connected with the production process.
4. Specific Industry Occupations: Includes those occupations particularly characteristic of the industry under consideration.

NATURE AND CONTENT OF THE TABLES:

The wage information contained in this report is presented in three types of tables. The first is an industrial breakdown on a provincial basis. The industry tables show the average and predominant range for each occupation. The wage information applies to office occupations, maintenance trades, service occupations and specific industry occupations.

The second group reports data on a regional basis which includes county and urban area breakdowns. In this section, information is presented by occupational classification. The specific industry occupations have been subdivided by major industries.

This year, for the first time, the survey includes a group of tables representing condensed wage data for selected occupations, by sex, industry, county, and urban area. The tables are, in the main, repetitive, but because of their comparative form the reader is introduced more readily to the wage trends provincially as well as regionally.

NATURE AND CONTENT OF THE TABLES (CONT'D)

Certain occupations were reported by the employer on both an hourly and weekly basis. Therefore, to make the data accurate and to report as many employees as possible, these occupations were separated according to their pay periods (hourly and weekly). The occupations concerned are the following: Cleaner (Male); Clerk, Intermediate (Female); Elevator Operator (Male); Passenger Elevator Operator (Female); and Watchman (Male).

EXPLANATION OF TERMS

The term "average" as used in the report is the weighted average of straight time rates paid on a time basis in an occupation. To obtain this average, the wage rates or earnings in an occupation are multiplied (weighted) by the number of employees receiving each rate, the total product being then divided by the total number of employees in the occupation used in the calculation of the average.

The "predominant range" of rates and earnings includes the middle 80 percent of the numbers of all employees reported in an occupation. In other words, ten percent of the workers received the highest figure shown in the range or more, and ten percent receive the lowest figure or less. No ranges are shown where the rates for an occupation apply to fewer than ten employees and also when there are ten or more employees having a range identical to the average.

"Standard hours per week" refer to the number of hours per week normally scheduled for office and non-office employees in an establishment and during which straight time or regular wage rates are paid. Averages of the standard hours are obtained by multiplying the number of standard hours by the number of workers in each establishment and dividing by the total number of workers.

EMPLOYEE COVERAGE

"Office Employees" include clerical, stenographic and secretarial personnel and non-supervisory white-collar technical personnel, such as, computer-personnel and draughtsmen. In addition, supervisory personnel who normally do the same work as the office employees they supervise are included.

"Non-Office Employees" include those engaged in productions and assembling activities; those employed in storing, inspecting, handling, packing, warehousing, truck-driving and sales and service personnel; and driver-salesmen and their helpers. It also includes employees engaged in maintenance, repairs, janitorial and watchman services, and supervisors who normally do the same work as the production or service employees they supervise. Personnel who are on the payroll but do not work at the establishments' locations should also be included.

CRITERIA FOR PUBLICATION

Generally, for an average to be published, the rates which have been calculated must apply to five employees in the occupation in three establishments, or to ten or more employees in two establishments, provided that 80 percent or more of the total number of employees is not reported by one of the two establishments.

These criteria are applied for two reasons: to avoid revealing the rates paid by any one establishment, and to ensure a reasonable degree of representativeness of the data.

1968 REPORT

This is the fourth annual survey published by the Nova Scotia Department of Labour. In this report the industries have been classified from the 1960 Standard Industrial Classification of the Dominion Bureau of Statistics. (Complete details on this classification appear in the Standard Industrial Classification Manual, D.B.S. Publication 12-501.)

PART 1 - HOURS OF WORK

INDUSTRY	NUMBER OF ESTABLISHMENTS	EMPLOYEES		HOURS	
		Non-Office	Office	Non-Office	Office

APPENDIX A

Salary rates for salespersons, both male and female, were reported according to the following definitions:

Salesperson - Class A

Requires little knowledge regarding the merchandise sold. Often works behind a counter, selling one or a variety of inexpensive commodities such as notions, candy, drug sundries, tobacco products, magazines, greeting cards, etc.

Salesperson - Class B

Requires enough knowledge of products to assist customers in making a selection. May sell various types of merchandise or specialize in a particular type of commodity such as wearing apparel, bedding, small electrical appliances, china, costume jewellery, general hardware, etc.

Salesperson - Class C

Requires detailed knowledge of products and considerable skill in salesmanship. Is often on salary and commission and may be required to follow up prospective sales by calling on customer at his home. Products sold tend to be higher priced, such as furniture, refrigerators, television sets, power tools, air conditioners, jewellery, etc.

Only non-commissioned salesmen have been included in this survey.

APPENDIX B

The following are the delimitation of the six Urban Employment Areas¹ for Nova Scotia as shown on the map on the following page.

Amherst - Area bounded by a line beginning at Nappan on the Chignecto Canal connecting with Hastings northeast of Nappan, then bending back to the Nova Scotia - New Brunswick boundary in the direction of Sackville. Area includes all above-named Nova Scotia centres.

Halifax² - Cities of Halifax and Dartmouth; Armdale and Fairview Area, Bedford and Waverely Area, Cole Harbour and Eastern Passage Area, Herring Cove and Spryfield Area, North Dartmouth Area and the Rockingham Area.

New Glasgow - Area bounded by a line from Logan Point to the town of Pictou, south to the villages of Alma, Westville and Eureka, north to Stellarton, New Glasgow, Trenton, and ending in Pictou Harbour. Area includes all above-named centres.

Sydney - Area bounded by a line drawn from Point Aconi to the Little Bras d'Or River along St. Andrew Channel to the village of Barachois. From here east to the village of Gibbon ending at Cape Perce. Area includes all above-named villages.

Truro - Area bounded by a line drawn from the village of Clifton, north to the village of Belmont, east to the village of Riverdale, southwest to the village of Brookfield and back to Clifton. Area includes all above-named villages.

Yarmouth - Area bounded by a line from Sandford on Highway 1 to Ohio on Highway 10 to Arcadia on Highway 3 and ending at Chebogue Point. Area includes all above-named centres.

¹Dominion Bureau of Statistics, Part I - Delimitation of Urban Employment Areas. Ottawa, Ontario.

²On January 1, 1969 the City of Halifax amalgamated the adjacent areas of Purcell's Cove, Spryfield, Jollimore, Melville Cove, Fairview, Rockingham, Birch Cove, Prince's Lodge and Fernleigh Park. The old boundaries, however, were still in existence at the time of this survey and will apply to it.
